

6055 Steinel LCD Hot Air Welder

Urethane Supply Company's 6055 Weldy Pro Hot Air Welder is perfect when you want a simple, attractively priced, and attractively styled hot air welder. This tool is ergonomically designed with a durable thermoplastic body and comfort padded grip.

Benefits:

- Totally self-contained with built in blower! No need to hook up to compressed air source.
- Two speed blower control switch.
- Easy to use temperature control dial.
- Use it as high-temp heat gun or install the included slip-on welding nozzle to focus the stream of hot air for welding plastic.
- Comes with slip-on speed tip to help you guide your welding rod into the proper position.
- Stands vertically for hands-free heat-up and cool-down.
- Quality manufactured in Switzerland by Leister, a leader in industrial hot air welding equipment.

Application:

- Plug into 110V power source and begin welding immediately. Takes just seconds to warm up to operating temperature.
- Reduce temperature dial to "MIN" and allow heating element to cool before turning off blower motor.
