

Steinel Heat Gun

P/N: 6500VT

UltraHEAT II

The Steinel UltraHEAT™ II is a full featured variable temperature heat gun with three airflow settings for maximum user control. This lightweight and easy to use model has a soft grip handle for comfortable operation. It also offers quick heat-up and ultra quiet operation. The Steinel heat gun generates up to 1050°F (565°C) air temperatures; great for reshaping dented and torn bumpers. The versatile UltraHEAT™ II heat gun kit includes two heavy gauge nozzles and a heavy duty carrying case.

Benefits:

- Variable temperature and air flow.
- Rapid heat up and cool down.
- High maximum temperature.
- Durable, ergonomic construction.
- Ultra-quiet operation.

Kit Contents:

- Variable temperature control up to 1050°F (565°C).
- 3 stage airflow: Cool air 140°F (60°C), low air, high air
- 1400 watt - 110V/15Amp heating element
- Rubber power cord, double insulated
- Spreader nozzle
- Reflector nozzle
- Heavy Duty Carrying Case
- UL/C-UL approved
