

ATV Welder

P/N: ATV, ATVPRO

Airless Plastic Welder

Urethane Supply Company's ATV Welder and ATV Welder PRO are easy-to-use plastic welding kits that come complete with everything needed to repair most ATV and dirt bike fenders. Plastic welding is the only repair method that will produce a strong, permanent color-matched repair to polyethylene body panels and gas tanks on ATVs and dirt bikes.

Benefits:

- Ideal for making permanent, high quality repairs to the polyethylene plastic commonly used in ATV fenders, dirt bike fenders and fuel tanks.
- Repairs blend with the original plastic and produce a strong and cosmetically pleasing repair.
- Very easy to use.
- Stronger repair on polyethylene than any adhesive.
- ATVPRO welder has three times as much welding rod, a more powerful 80 watt heating element and stainless steel reinforcing mesh.
- Perfectly suited for the home repair shop of active outdoorsmen.
- Save hundreds of dollars and natural resources by repairing, instead of replacing, plastic parts.

Kit Contents:

ATV Welder

Part No.	Description	Qty
L40	40 watt heating element	1
5003R4	Natural Polyethylene Rod	15 ft.
6027HT	Tube Welding Tip	1
